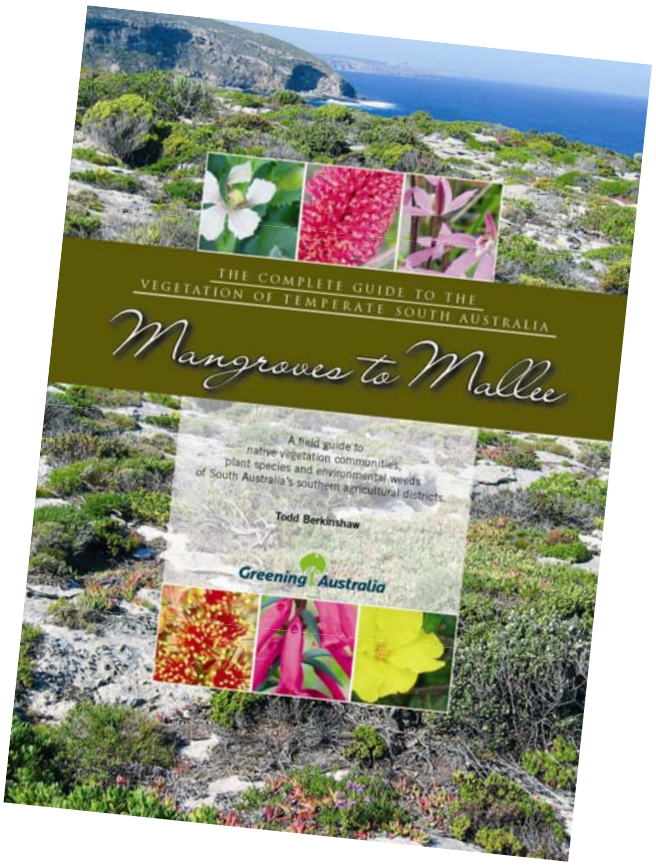
Mangroves to Mallee

The complete guide to the Vegetation of Temperate South Australia



The third and most comprehensive publication in the series written by Todd Berkinshaw.

This in-depth guide explores the identification, protection and restoration of native vegetation communities and plant species of South Australia's southern agricultural districts.

Features include: full colour images, text and mapping of over 55 major plant communities, over 400 native plant species and 100 weed species in the one publication.

We'd like to thank our sponsors Santos Ltd, Native Vegetation Council and CMV Foundation for supporting the production of the guide.
